

# **ISTE: Shaping the Future with Technology & Humanity**

---

**Bridging Continents:  
A Strategic Partnership  
Proposal for APAIE 2026**

# An Innovation-Oriented Ecosystem

## Our Vision: Technology for Humanity

- Established in 2015, built on a strong engineering heritage dating back to 1993.
- A dynamic education model moving beyond passive learning to active solution generation.
- Mission: To adapt quickly to the changing world and solve universal problems through R&D.

# Strategic Location: The Energy & Logistics Hub

## Global Energy Hub

Located at the heart of the Eastern Mediterranean, surrounded by major energy infrastructure.

## Heavy Industry Access

Proximity to iron-steel production giants and international logistics centers offers unparalleled field research.

## City Integration

Campus located in Iskenderun city center, facilitating seamless industry interaction.

# — **Leading the Blue Economy**

## Faculty of Marine Sciences & Technology

- **RV/ISTE 1 Research Ship:** A dedicated vessel for fisheries, marine biology, and trawling research.
- **ISTE II:** Research boat for coastal observation.
- **Diving Tower:** Specialized facility for underwater technology training.
- **Focus Areas:** Marine Transportation Engineering, Marine Ecology, and Water Resources Management.

– **Leading the Blue Economy**  
Faculty of Marine Sciences & Technology

**Our faculty consists of four departments:**

- Department of Maritime Transportation and Management Engineering
- Department of Maritime Business Administration
- Department of Marine Engineering
- Department of Naval Architecture and Marine Engineering

# From Deep Sea to High Sky

## Faculty of Aeronautics and Astronautics

### Specializations

- UAV/Drone Technology & Avionics
- Aircraft Maintenance & Repair (Body and Engine)
- Aerospace Engineering: Aerodynamics & Rocket Technology

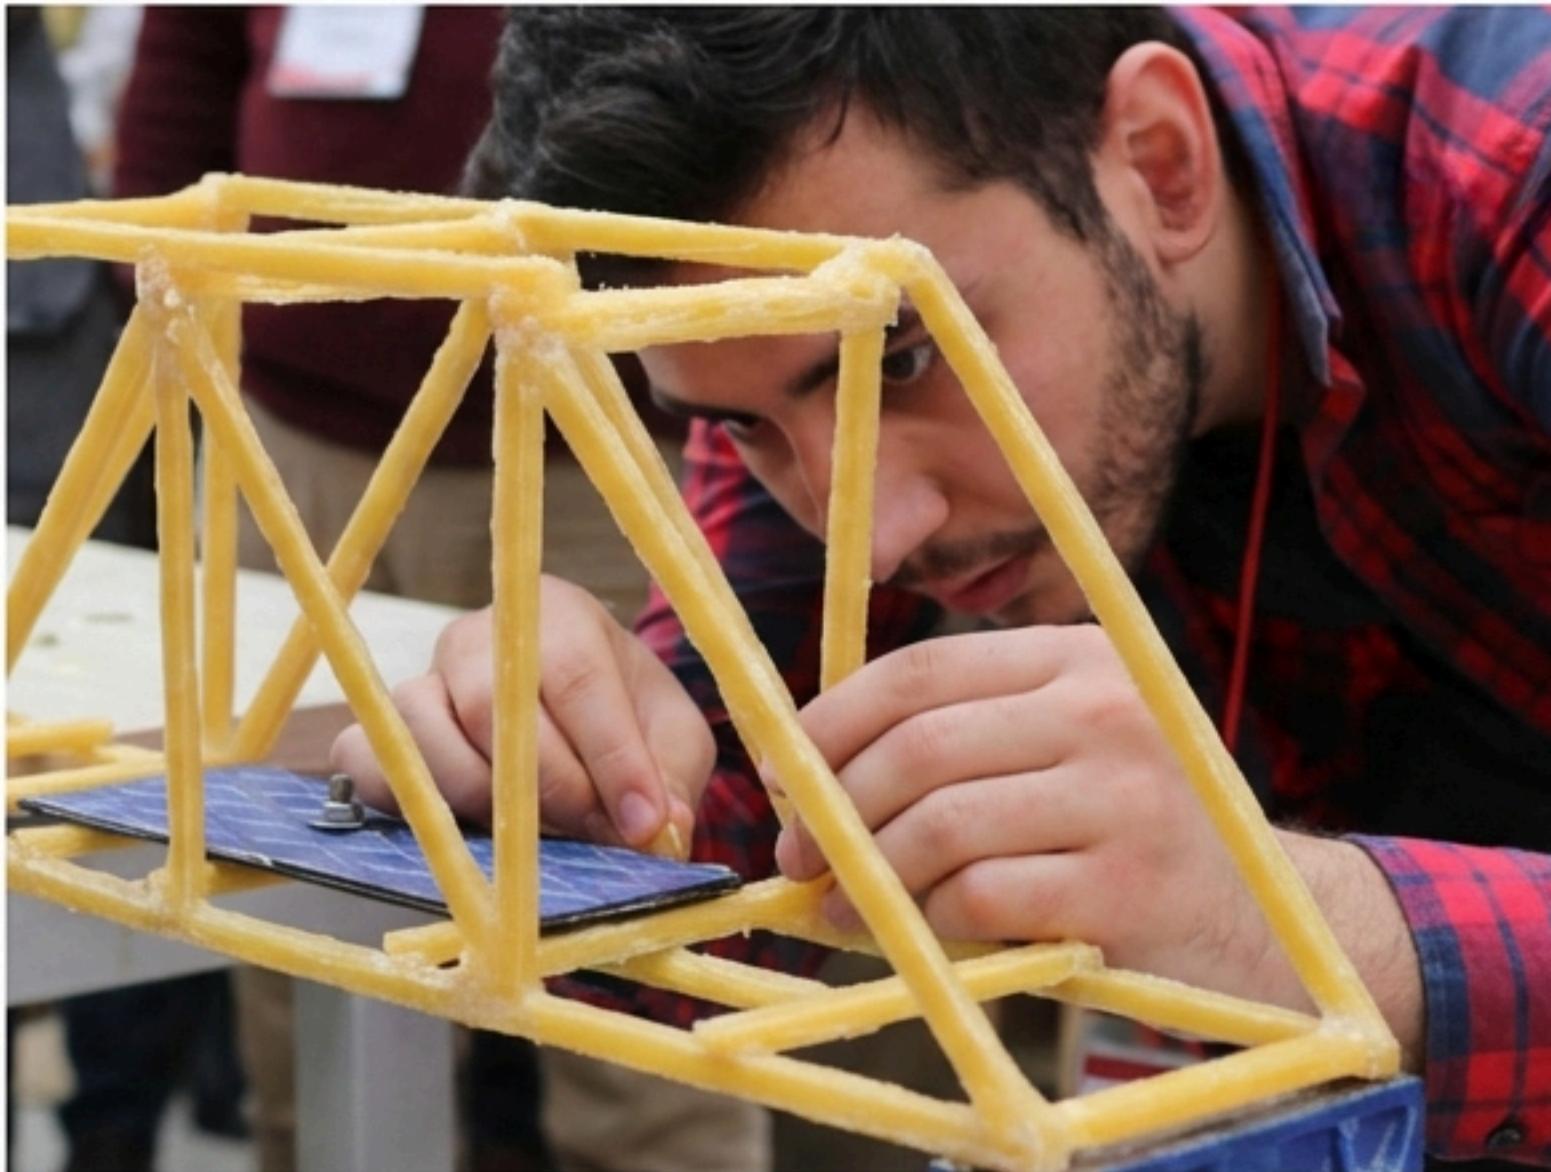

### Infrastructure

- On-campus active maintenance workshops.
- Direct industry preparation through hands-on technical training.

# R&D and Engineering Power

Engineering Solutions for Real-World Problems

## Faculty of Engineering & Natural Sciences

- **Disciplines:** Computer, Biomedical, Electrical Electronic, Industrial, Energy Systems, Civil, Mechanical, Mechatronic, Metallurgy and Materials, Basic Sciences, Petrol and Natural Gases Engineering.
- **Track Record:** Consistently high success rates in TUBITAK projects.
- **Student Success:** Multiple awards in UNIDES and national project exhibitions.
- **Culture:** A focus on algorithmic solutions and structural design precision.

# Industry Integration: The iME Program

## Vocational Training in Business

### A Signature Pedagogical Model

- **Full-Semester Immersion:** Students spend the entire 8th semester working full-time in the field, not in the classroom.
- **Dual Evaluation:** Performance is graded by both academic professors and industry mentors.
- **Outcome:** High employability rates and seamless transfer from academia to professional careers.
- **Sectors:** Factories, Logistics Centers, Ports, and Tech Firms.

# Cultural Diplomacy: The Taste of Hatay

UNESCO City of Gastronomy

## Department of Gastronomy & Culinary Arts

- Experience the intersection of history, culture, and culinary science in a UNESCO-recognized city.
- Home of 'Kunefe' and a melting pot of civilizations.
- A unique exchange opportunity: Study high-tech engineering by day, explore ancient traditions by night.

# A Global Campus Community

## Mobility & Exchange

### Join Our Community

- Active participants in Erasmus+, Mevlana, and Farabi exchange programs.
- A green, safe, and student-friendly campus environment.
- Rich social activities and student clubs.
- We are open for bilateral agreements and staff mobility.
